Where do I start?

Let me introduce you to your personalized exercise program! You're going to crush it! 🏆

Enter this code once you open PhysiApp to get started.

I just logged in and can't wait to start. Thanks! 🙌

Kick off your program!

Your healthcare provider gives you a personalized exercise program and an 8-letter code via email, a printed handout with a QR code, or in person.

1st choose your device

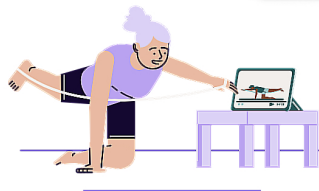

Log In Anywhere

Access PhysiApp from any device—smartphone, smartwatch, or computer. Your physiotherapist will provide you with a code to log in and begin your recovery journey, whether you're at home or on the go.

Complete your daily routine!

Follow Your Path

Watch clear video demonstrations, track your progress, and stay connected with your practitioner. Complete exercises regularly to build streaks and accelerate your recovery.

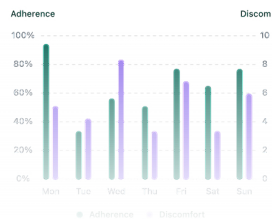

YOUR RECOVERY, IN YOUR HANDS

Track Your Recovery Journey

Real-Time Progress Insights

Access exercises via the PhysiApp app, web browser, printed handouts, or Apple Watch. Your recovery continues on any device.

How to Start Your Exercises?

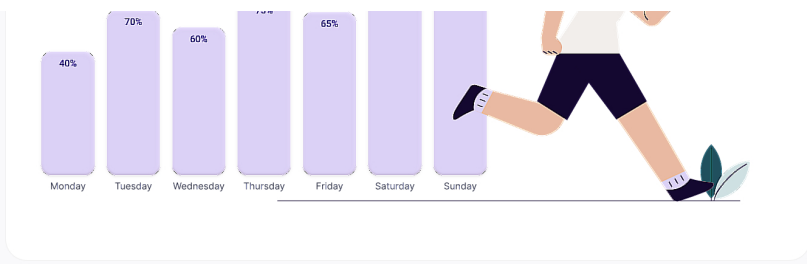

Access exercises via the PhysiApp app, web browser, printed handouts, or Apple Watch. Your recovery continues on any device.

Consistency Leads to Recovery

PhysiApp encourages daily adherence to your rehabilitation program by tracking progress, celebrating streaks, and visualizing improvements. Small, consistent steps with PhysiApp help you recover faster and achieve better outcomes.

↑ 2000+

↑ 30%

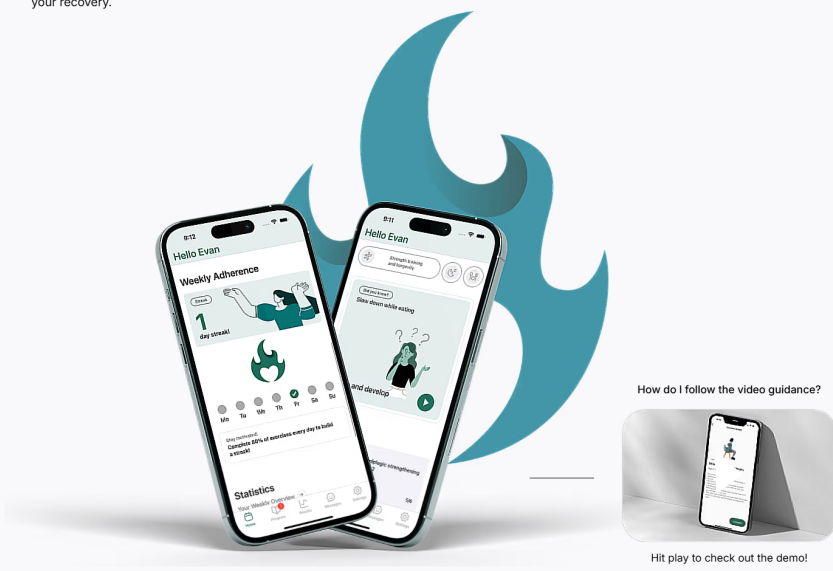

Enhancing patient engagement strategies for better outcomes.

↑ 100+

Clinical trials are vital for advancing medical knowledge and enhancing patient care.

Did you know

You can boost your streak by achieving over 80% daily adherence! It's such a rewarding feeling to see how much effort you've put into your recovery.

Reach your physiotherapist anytime, anywhere!

»

Hi! 🌟 How are you today? Is everything going well with your exercise program?

Resisted bird dog

Core muscles strengthening with resistance band.

9/10

Let's switch this exercise, then! Try the regular bird dog without a band and let me know how it feels.

Your Exercise modified:
Resisted bird dog → Bird dog

You have a new notification*

I'm feeling stronger with every exercise! But the resisted bird dog is difficult; I can't complete all the reps.

That's much better! 🙌 My discomfort level is lower and I can complete all reps. Thanks!

So what is the difference?

physitrack

Is the tool designed for physiotherapists.

Physitrack provides tools to create exercise programs, track patient progress, and manage your practice. Physitrack connects exercise programs directly to patients, allowing them to complete exercises designed in Physitrack.
